JUN 1 6 2012

To The Town of The Blue Mountains Council:

Solar Power Network (SPN) is a thoroughly Ontarian company specializing in the installation of domestically-manufactured solar panels on unused commercial, industrial, and institutional rooftops. SPN has thus far partnered with 48 building owners in The Town of The Blue Mountains and, in support of these partnerships, we are seeking Council's endorsement to develop a rooftop solar network within the community. This endorsement will, under the new Feed-In Tariff program rules, grant priority to local businesses in receiving Ontario Power Authority (OPA) approval to commence installation, but will in no way circumvent the right of The Town of The Blue Mountains Council to engage in review or oversight of these projects. Solar Power Network is not seeking and will not seek any financial or material aid from The Town of The Blue Mountains Council.

Unlike wind turbines or ground-level solar farms, rooftop solar neither ties up valuable real estate nor interrupts the natural beauty of the landscape. In fact, the one-of-a-kind zero-penetration panel mounting approach developed by our engineers installs at such a low profile as to generally be invisible from street-level, resulting in total preservation of building aesthetics. Encouraging the development of rooftop solar will further the environmental plan of The Town of The Blue Mountains and stimulate local commerce without introducing problematic eyesores.

Due to schedules imposed by the Ontario Power Authority, time is a factor in this endorsement process. If we are to begin developing these valuable partnerships during the 2012 calendar year, a resolution will need to be passed by late-June at the latest. SPN would be happy to send a delegation to address The Town of The Blue Mountains Council at the next meeting.

Please also find enclosed in this information package a sample resolution (as drafted by the OPA), as well as a brochure explaining more about the Solar Power Network business model and installation process.

We look forward to hearing from you,

Peter Goodman

President and CEO

Solar Power Network

PRESCRIBED FORM: MUNICIPAL COUNCIL BLANKET SUPPORT RESOLUTION

(Section 6.1(c)(i) - FIT Rules, Version 2.0)

Capitalized terms not defined herein have the meanings ascribed thereto in the FIT Rules, version 2.0.

RESOLUTION NO.: _____ DATE: _____

WHEREAS the Province's FIT Program encourages the construction and operation of rooftop solar generation projects (the "Projects").

AND WHEREAS one or more Projects may be constructed and operated in [insert the name of the municipality].

AND WHEREAS, pursuant to the rules governing the FIT Program (the "FIT Rules"), Applications whose Projects receive the formal support of Municipalities will be awarded priority points, which may result in these Applicants being offered a FIT Contract prior to other persons applying for FIT Contracts;

NOW THEREFORE BE IT RESOLVED THAT:

Council of the [insert the name of the municipality] supports without reservation the construction and operation of the Projects anywhere in [insert the name of the municipality].

This resolution's sole purpose is to enable the participants in the FIT Program to receive priority points under the FIT Program and may not be used for the purpose of any other form of municipal approval in relation to the Application or Projects or any other purpose.

This resolution shall expire twelve (12) months after its adoption by Council.

Energy from the sun

is one of the cleanest, most renewable power generation resources available. The vast majority of Ontario rooftops sit empty, while they could be improving the future of Ontario's clean energy mix, not to mention your business' bottom line. An Ontario-based company, Solar Power Network is an advocate for local solutions to our province's energy needs, using proven solar technology to feed energy back to the grid.

Solar Power Network is building a network of companies who are committed to a kinder way to power our future. The concept is simple. Solar Power Network turns customer's unused rooftop space into sources of green revenue. The impact is significant. Solar Power Network's customer network demonstrates a growing commitment to the future of sustainable energy development. Solar is a relatively young industry in Canada, which is what makes Solar Power Network's extensive experience in rooftop management, engineering and construction so important. Solar Power Network's team of engineers understands how to maximize the use of your rooftop, while minimizing the impact on the structure. Solar Power Network's experience also allows us to be the best business to partner with due to our unmatched rooftop maintenance care, while offering the most straightforward payment programs and lease agreements in the business.

Today, Solar Power Network has successfully grown its Network to include over 230 Ontario companies. These like-minded organizations have joined our growing network of companies who are committed to building a kinder way to power our province's future together. Solar Power Network is turning 6 million square feet of underutilized rooftops into spaces that will generate 60MW of renewable energy. With this kind of early adoption and innovation, solar simply makes sense – for our health well into the future.

ANDY HOLWELL, Jamieson Laboratories Ltd.

The Ontario government understands the importance of green energy in the province's energy mix. In 2009, the Ontario Liberals introduced the Green Energy Act, which through the Ontario Power Authority, guarantees preferential rates to developers of renewable energy. The program offers a 20-year term, allowing building owners to enjoy the security of both preferred rates and an extended commitment to lessening our dependence on coal-fired power plants. To solidify your spot within the program, it's important to act now.

The public is rewarding companies that are good corporate citizens, especially within their local community, more than ever before. In response, many organizations are looking for effective ways to lessen their carbon footprint and demonstrate goodwill toward the community. Instead of waiting for green initiatives to be mandatory or mandated, many companies are looking to SPN for industry leadership. This makes solar the perfect solution: Use your otherwise unused rooftop for a pressing, game-changing environmental cause in Ontario's renewable energy sector—and earn revenue while doing it.

Solar Power Network knows that your rooftop is the most important part of your building asset. We also believe it can be valuable to your organization's bottom line. Rooftop solar with Solar Power Network is a low-risk, high-reward addition to your organization's green commitment and revenue. It's also a commitment to join a growing network of companies committed to a kinder way to power our future.

Solar Power Network offers customers an innovative low panel angle, which results in 5 additional pounds per square foot added to your rooftop. This compares with other solar companies who use traditional, higher panel angles, which typically result in an additional 20 pounds per square foot on rooftop. Rooftops that cannot support this additional weight are disqualified, making Solar Power Network the right choice.

Our installation process respects the integrity of your rooftop structure. With leading panel mounting technology, SPN uses an innovative line of mounting brackets and panel systems that require no penetrations or reinforcements. Through our leading-edge low panel angle, wind load is drastically reduced compared to conventional applications, while maintaining the aesthetics and curb appeal of your current rooftop space. SPN's technology also allows for broader participation in solar panel installations across the province: At 5lb/sq ft, our panels put significantly less load on your rooftop structure compared to other industry players, allowing for the use of rooftops that can't sustain traditional panel loads.

We want to ensure the maintenance of your rooftop space continues to be a simple process. Our unmatched maintenance program ensures the warranty on your rooftop is not compromised, while allowing for easy repairs. Once every five years, SPN will remove a string of panels to allow for rooftop repairs at no cost to the partner organization. Should you need to replace your roof envelope within the term of your contract, SPN will remove the entire panel system to facilitate the repairs. Our support team is available seven days a week, and will gladly respond to your needs and make arrangements on the same day.

Alongside the financial advantages to joining the network, SPN partners also have the opportunity to use their involvement in the program as part of important, ongoing marketing initiatives. Following installation, the SPN team will provide your company with real-time online tracking showing the energy being created on your individual rooftop space—numbers that can be used on your website and broader marketing efforts to your audiences. SPN will also provide signage and marketing collateral to help partners demonstrate their contributions to clean energy generation.

Solar Power Network believes in providing customers with a straightforward process from the first meeting through to when their solar project is connected to the electricity grid. Below is the five point process we follow for each solar project:

1. Lease Agreement with Building Owner

- *Negotiate lease*
- *Apply to Ontario Power Authority*

2. Contract offer from OPA

- *Local Distribution Carrier (LDC) preliminary*
- *Contract offer from OPA*
- *Contract Acceptance by SPN*

3. Connection approval from local hydro company

- *Detailed Connection Plan submitted by SPN to LDC*
- *Details reviewed by LDC*
- *Approval by LDC*

4. Engineering, design and approvals

- *File Plan with OPA*

5. Construction and connection to electricity grid

- *Notice To Proceed received from OPA*
- *Financing arranged*

With an extensive background in rooftop leaseholds, our leasing agreement is the most straightforward and competitive in the industry. We designed our leasing agreement with our partners in mind. At SPN, we understand that your rooftop is an important part of your business operation. As such, our leasing agreement leads the industry in terms of maintenance and repair. Not only do we provide our customers with an unmatched maintenance program, but we are available seven days a week to remove panels for repairs, when needed.

- **Roof repairs over the term of the lease**
- **Preservation of your existing roof warranty**
- **No impact Installation guarantee**
- **Flexibility with respect to payment**
- **And much more**

PRESCRIBED FORM: ABORIGINAL SUPPORT RESOLUTION
(Sections 6.1(c)(ii) and (d) of the FIT Rules, Version 2.0)

RESOLUTION

of _____ (the "Aboriginal Community")

Proposed by: _____

Seconded by: _____

WHEREAS:

- (i) _____ (the "Applicant") intends to submit an application (the "Application") to the Ontario Power Authority (the "OPA") for a contract pursuant to the OPA's feed-in tariff program (the "FIT Program") in respect of a proposed renewable electricity generation facility (the "Project");
- (ii) The Applicant desires to develop the Project on lands in respect of which the Aboriginal Community holds or may hold constitutionally protected Aboriginal or treaty rights as designated by the Ontario Ministry of Environment (the "Subject Lands");
- (iii) Pursuant to the rules governing the FIT Program (the "FIT Rules"), Applications whose Projects receive the formal support of Aboriginal Communities corresponding to the Subject Lands in the form of a support resolution (an "Aboriginal Support Resolution") will be awarded priority points for the purpose of ranking the Application in relation to other applications for a contract under the FIT Program; and
- (iv) The Applicant seeks this Aboriginal Support Resolution to demonstrate that the Aboriginal Community supports the Application and the Project;

NOW THEREFORE WE DO HEREBY RESOLVE that:

- 1. The Aboriginal Community supports the Application and the Project;
- 2. The passing of this resolution does not, nor shall, have any bearing whatsoever on any Aboriginal or treaty rights or interests, whether constitutionally recognized or otherwise, including the Crown's duty to consult, and for greater certainty cannot restrict, limit, extinguish or adversely affect any such right or interest.

**DULY RESOLVED BY THE COUNCIL OF THE ABORIGINAL COMMUNITY OR
EQUIVALENT GOVERNING BODY**

(Note: insert name of governing body only if not a "Council")

on the _____ day of _____, 201__.

(Note: signature lines for Chief, councilors or other representatives, as appropriate)
