RR#2 Clarksburg

Ontario , N0H 1J0

To Mayor Ellen Anderson, David Finbow, Shawn Evertt, Duncan McKinlay

I am writing a letter to voice concerns over a few issues at Ravenna Hall. I rent this on a regular basis for workshops related to my business and love this little hall. It is so good to see it being used.

I have a concern with lights there has been one fluorescent set of lights near front door out since before Feb. I know that the care taker passes along information but nothing has been done. My group does need good lighting.

Also we are out of water not totally sure why as it has rain a lot lately. We had an event there on weekend , we had water there for purpose to flush toilets ,but the toilets just put in are to be super efficient ones ,don't work well even when there isn't a problem . They normally don't have enough pressure to flush toilet paper down, I have to tell my clients to throw paper to back of toilet so it will hopefully go down and not have to flush it two or three times to get it down.

Also people want to come in there when we were having our event to use toilet. I feel there should still be a portable toilet out by park area available. It wasn't so good when no water as we have a certain amount with us .

I was wondering why we couldn't have a load of water put into the well during this time? Is there a problem with the pump as there was one outside? There are a lot of events that go on at this hall and I feel that we need to keep up to date with maintenance so it keeps this hall active and functional. The caretaker and volunteers do a good job . It would be nice if they could get a little help. Thank you for your time. Look forward to hearing from you thank you

Sincerely

Sylvia McMurchy
