RECEIVED

FEB 16 2011

TOWN OF THE BLUE MOUNTAINS
PLANNING & BUILDING SERVICES
PER _____

Lights on exterior of 17 Limestone
lane on each corner of building
are too bright and directed at
neighbouring residences and the sensitivity
of motion detection switch is set too high.
Much dimmer light (wattage of 15-25)
is needed as well as redirection to
prevent ~~illumination~~ illumination of neighbouring
properties and adjustment of motion detection
sensitivity. would address the loss of
enjoyment issues ~~experienced~~ being
experienced by the many neighbours.

Thank you
