RE: Water Pressure Zone 4C Distribution Improvements Notification of Project

Dear Resident,

This letter is to advise you of upcoming Engineering & Construction work to improve the water distribution system in the area of your property. The work is being undertaken to improve water pressure consistency and fire flow capacity in the area within and surrounding Pressure Zone 4C.

Pressure Zone 4C is made up of the area locally know as Tyrolean Village and includes Craigmore Crescent, Arlberg Crescent, Birch View Trail, Tyrolean Lane and Kandahar Lane. The preliminary engineering was completed earlier this year to identify and select the preferred solution. The Town is now moving to final design and has recently awarded the contract for the detailed design and construction administration to WT Infrastructure Solutions Inc. (WT).

It is anticipated that the design will be completed this spring with construction starting this summer or early fall. Additional information will be provided in advance of the construction work being started. The work for this project is expected to be limited to the areas of Craigmore Crescent between Tyrolean Lane and Settlers Way, Tyrolean Lane between Craigmore Crescent and Arlberg Crescent and Birch View Trail between Arlberg Crescent and Brooker Boulevard, as well as the intersection of Craigmore Crescent and County Road 19.

WT Infrastructure Solutions Inc. and their sub-consultants will be on-site starting on or about Monday, December 9, 2019 intermittently for several weeks to drill boreholes within the road right-of-way followed by surveying and utility location to confirm existing conditions. This work will be completed during normal business hours and there will be no need for the sub-consultants to enter your property for this project other than to confirm the location of your property line.

For project updates, please visit the project page on the Town's website:
<https://www.thebluemountains.ca/municipal-infrastructure-projects.cfm>

Please direct any inquiries or concerns to myself or Jamie Witherspoon of WT Infrastructure Solutions:
