Temporary Tents within the Town of The Blue Mountains

This guide provides specific information related to building permit application requirements for temporary tents and has been developed to assist property owners to allow the temporary use of a tent or a group of tents for special events within the Town of The Blue Mountains.

This guide should not be relied on in place of professional expertise. If you are unfamiliar with building construction procedures, the assistance of a qualified building contractor or architect can save you both time and money.

The Owner is responsible for ensuring compliance with all current Town by-laws and other applicable regulations. Although every attempt has been made to provide accurate information at the time of printing, it is subject to change without notice and is provided as a guide only.

If you are new to the process or are uncertain of the Town of The Blue Mountains permit application process /requirements contact the Planning and Development Services Department - Building Services Division:

(519) 599-3131 ext. 239 or build@thebluemountains.ca

Definition of a Temporary Tent

The word “tent” as used in the Building Code is intended to refer to a temporary shelter which is used at an open air event such as a fair or an exhibition. A tent will normally be constructed of a fabric held up by poles and attached to the ground by ties. The requirement for a tent permit is not intended to be applied to fabric structures located on buildings.

Note: Permanent fabric structures are not addressed in this guide and have their own set of requirements under the Ontario Building Code.

• A Plumbing Permit is required for any plumbing work.
• If food will be prepared or served, Grey Bruce Health Unit approval will be required.
• If alcoholic beverages will be served, a Liquor Licence will be required.
Building Permit Required for a Tent or a Group of Tents

Ontario Building Code 1.3.1.1. (5), Division C

A tent or group of tents is exempt from the requirement to obtain a permit under section 8 of the Act and is exempt from compliance with the Code provided that the tent or group of tents are,

(a) not more than 60 m² in aggregate ground area,
(b) not attached to a building, and
(c) constructed more than 3 m from other structures.

* The aggregate ground area refers to the sum of the total area of all tents on site. Therefore, if the total ground area of all tents on site exceed 60 m² (645 ft²), then a permit is required.

A permit for a tent is required if you answer “yes” to any of the following statements:

✓ Is the proposed tent(s) larger than 60 m² (645.6 ft²) in aggregate ground area?
✓ Will it be attached to a building?
✓ Will it be constructed less than 3 m (9 ft-10 in) from another structure or property line?

Example:

A. ABC Tent Rental wishes to install three (3) 10 ft x 10 ft tents for a baseball tournament that is to take place in a park.

• No other tents will be installed on that day and the tents are located at least 10 ft (3.1 m) away from any other structure and property lines.

• The area of all three tents is 300 ft² = 27.87 m² therefore, a permit is not required for installing these tents.

B. The following week there is another tournament and the organizers of the event would like to have one more tent.

• ABC Tent Rental will be supplying the same three tents that were used last week, and XYZ Tent Rental will be supplying one (1) 20 ft x 20 ft tent.

• The area of all four tents is 700 ft² = 65.03 m² therefore, a permit is required for installing these tents.

The most current Building Code is available at [http://www.ontario.ca/laws/regulation/120332](http://www.ontario.ca/laws/regulation/120332)

**Note:**

1. Any tent with sidewalls shall be designed by a qualified and registered designer (BCIN)
2. A tent <225m² in area and with no sidewalls or bleachers shall be designed by a competent person.
3. The ground enclosed by a tent and for not less than 3m outside of such structure shall be cleared of all flammable or combustible material or vegetation that will carry fire.
Temporary Tents

Additional Requirements for Large Tents: Tents > 225m²

Qualified Designer and Field Review Requirements

A Qualified and Registered Designer shall be required where the tent or a group of tents:

a) Exceed 225m² (2,420ft²) in ground area
b) Exceed 225m² (2,420ft²) in aggregate area and are closer than 3 metres apart,
c) Contain bleachers, or
d) Enclosed with sidewalls.

Note:

An application for a tent or a group of tents that are not in compliance with the above conditions will require a Professional Engineer to perform a field review.

The support structure, frame and anchorage shall be designed, sealed and reviewed by a professional engineer, who is registered and licensed to practice in the province of Ontario.

The Professional Engineer shall provide details and calculations for anchorage, wind, snow (if applicable), rain load and, confirm the structural capacity of the site to support imposed loads as follows:

- Wind, snow and rain load calculations/details
- Foundation/anchorage calculations/details
- Mechanical ventilation details (if applicable)

Example:

A. ABC Tent Rental wishes to install a 30ft x 30ft tent without any sidewalls. 
   As part of their Building Permit Application, they will not require a Professional Engineer to perform a field review, unless code compliance is not satisfactorily provided. 3.13.1.2(2)(a)(b), Div. B, OBC

B. ABC Tent Rental wishes to install a 40ft x 80ft tent (with or without sidewalls). 
   As part of their Building Permit Application, they will require a Professional Engineer to perform a field review. 3.13.1.2.(2)(a)(b), Div. B, OBC

C. ABC Tent Rental wishes to install a 30ft x 30ft tent less than 3 m (9ft 10 in) away from a 30ft x 60 ft.
   As part of their Building Permit Application, they will require a Professional Engineer to perform a field review. 3.13.1.2(2)(c), Div. B, OBC

D. ABC Tent Rental wishes to install a 30ft x 30ft tent without any sidewalls. Their customer will then be placing bleachers inside the tent.
   As part of their Building Permit Application, they will require a Professional Engineer to perform a field review. 3.13.1.2(2)(d), Div. B, OBC
Means of Egress and Exits

Ontario Building Code 3.14.1.3. (1), Division C
(1) Except as provided in Sentences (2) and (3), tents shall conform to Section 3.3 and 3.4.
(2) A tent need not conform to Article 3.4.6.12 except where swing type doors are provided.
(3) Where the area between adjacent tents or a tent and the property line is used as a means of egress, the minimum width between stake lines shall be the width necessary for means of egress, but not less than 3m.

Means of Egress

- Sufficient and unobstructed exits and aisles to accommodate the tents maximum occupant load.
- The travel distance to an exit from any point must not exceed 30m
- The headroom clearance for doorways shall be not less than 2030 mm (6’ 8”) 3.4.3.6.(3) Div. B, OBC
- Means of egress must be illuminated with light having an intensity of at least one (1) foot-candle while the structure is occupied.
- Power for means of egress lighting must be supplied from a separate circuit or source.

Exit Signs

- Emergency exit signage is required if occupancy is greater than 150 people.
- Required emergency exits must be designated and identified with proper signage.

Separation of Exits

Ontario Building Code 3.4.1.2. (1), Division B
(1) Except as permitted by Sentence (2), if more than one exit is required from a floor area, each exit shall be separate from every other exit leading from that floor area.
(2) If more than two exits are provided from a floor area, exits are permitted to converge in conformance with Sentence 3.4.3.1.(2), provided the cumulative capacity of the converging exits does not contribute more than 50% of the total required exit width for the floor area.

Sanitary Facilities

(1) Except as provided in Sentence (3), the minimum number of water closets for tents shall be determined in accordance with Table 3.7.4.3.E.
(2) Article 3.7.4.17. applies to sanitary facilities in Sentence (1).
(3) Sanitary privies, chemical closets or other means for the disposal of human waste may be provided in lieu of toilet fixtures.
Temporary Tents

Tents < 225m² (2420ft²):

Consult your local portable privy provider to determine how many privies you will require for your event.

Tents > 225m² (2420ft²):

The number of privies shall comply to Table 3.7.4.3.E of the Ontario Building Code, as amended.

<table>
<thead>
<tr>
<th>Number of Persons</th>
<th>Minimum number of Water Closets</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 to 50</td>
<td>2</td>
</tr>
<tr>

</tr>
<tr>
<td>181 to 220</td>
<td>8</td>
</tr>
<tr>
<td>220 to 260</td>
<td>9</td>
</tr>
</tbody>
</table>

For groups of 260 or more, provide 10+1 for each additional increment of 40 persons of each sex.
Fire Safety Requirements

The Ontario Fire Code contains minimum fire and life safety requirements specific to Assembly Occupancies for special events:

- All tent fabrics shall be certified to CAN/ULC-S109, “Flame Test of Flame-Resistant Fabrics and Films”, or NFPA 701, “Fire Tests for Flame Propagation of Textiles and Films.”
- Hay, straw, shavings or similar combustible materials other than that necessary for the daily feeding of livestock and care of animals shall not be permitted unless provisions have been made for such activities under the fire safety plan.
- Smoking and open flame devices shall not be permitted in a tent unless provisions have been made for such activities under the fire safety plan.

Electrical Safety Requirements

In Ontario electrical safety compliance inspections are conducted by the Electrical Safety Authority.

Your electrical contractor should be familiar with the electrical permitting and inspection process.

Any electrical systems shall be inaccessible to the public. Cables on ground in a tent shall be placed in trenches or protected to prevent damage.

An electrical permit is required for fairs and concessions when:

- Temporary wiring (lighting and power) is attached to the steel structure.
- Power is supplied to the structure from a permanent power-source,
- A generator is supplied that is required to be grounded
- The steel structure is required to be bonded to ground.

The ESA will conduct a visual inspection to see if the existing wiring and electrical service are safe. In addition to ensuring that electrical installations meet the requirements of the Ontario Electrical Safety Code, the inspector will check to see whether these installations are satisfactory.

For more information contact the Electrical Safety Authority directly at:

By phone: 1-877-ESA-SAFE (372-7233) OR www.esasafe.com
Once the Permit has been Issued

1. Once the permit is obtained for your tent; the erection of the tent may take place.

2. Prior to use or Occupancy, an inspection is required. You will need to book the inspection:

   **TO SCHEDULE AN INSPECTION**
   Please allow 2 business days for scheduling inspections

   - A permit number must accompany all requests via telephone and/or email
   - Ensure the reviewed permit package is printed in colour and on site for all inspections

     Inspection Phone Line:  519-599-3131 Ext. 239
     OR
     email: inspections@thebluemountains.ca

3. A Building Inspector will attend the site and verify the size, location and anchorage of the tent or group of tents and issue a Tent Occupancy Permit if satisfactory.

4. Upon completion of your event, the tent is to be removed and confirmed to the building department.

**Additional Approvals for All Tents**

Tents erected on Town property require approval.
Contact the Clerk’s Office at 519-599-3131 ext. 232 or clerks@thebluemountains.ca

Events that involves amplification of noise, music etc. is the applicant and owner’s responsibility to ensure that the event complies with the Town of The Blue Mountains Noise By-law.
Contact: By-law Services Division at 519-599-3131 ext. 249 or bylaw@thebluemountains.ca
