What is a Public Information Centre (PIC)?

A PIC is an informal open house that provides the public with an opportunity to learn about and provide feedback regarding municipal infrastructure projects. For the purposes of this PIC, the project’s consulting engineers (C.C. Tatham & Associates Ltd.) and Town Staff will be offering information to you about the preliminary preferred alternative solution to address the drainage deficiencies identified in the Thornbury West Study Area. The consulting engineers and Town Staff will be pleased to discuss and answer any questions you may have.

What should I expect to learn at this PIC?

At this important PIC, you will learn about the drainage deficiencies identified in the study area, the alternative drainage solutions developed to address the deficiencies and the evaluation process used to select the preliminary preferred alternative solution.

Comments collected at this PIC will be used to refine and finalize the preferred alternative solution for the Thornbury West Study Area. Additional information about the project and all information presented at the Public Information Centre will be available on the Town’s website (https://www.thebluemountains.ca/thornbury-west-master-drainage-plan-ea.cfm)
