To address structural deficiencies and safety concerns, Town of The Blue Mountains is considering alternative solutions at the 2 bridges located on 6th Sideroad crossing Mill Creek. The location of the structures is shown on the map included on page 2 of this notice.

**BRIDGES 2 & 3** are being planned as a Schedule A+ project under the Municipal Class Environmental Assessment, with the Town completing the phases associated with a Schedule B project to increase public consultation throughout the process. Alternatives being considered include:

- Do nothing;
- Permanently close and remove the existing bridges;
- Repurpose the bridges to non-vehicular traffic;
- Rehabilitate the existing bridges;
- Replace with single lane bridges; and
- Replace with two lane bridges.

Information about this project can be found at https://www.thebluemountains.ca/bridges-2-3-13-environmental-assessments.cfm. A joint Public Information Centre was held on July 9, 2019 and copies of the presentation boards are available on the website. Further to the comments received in relation to this Information Centre, we are extending the direct mailout area as well as the timeline for receiving comments.

We are requesting further input from the public, approval agencies and interested stakeholders on the various alternatives proposed, to be used in the evaluation and determination of the final preferred solution. All those with an interest in the project are encouraged to respond.

Comments and information collected as part of this process will be maintained on file for use during the Study, and, unless otherwise requested, may be included in the Study documentation which is made available for public review.

Comments are invited for incorporation into the planning and design of this project and the period for comment has been extended to **August 16, 2019**.
