

NOTICE OF DEVELOPMENT ACTIVITY

SLEEPY HOLLOW DEVELOPMENT Utility Work - Salzburg Place

The Town has been made aware that Utility Companies intend to undertake work for the above noted development project in your neighbourhood. We are providing this early notification to bring this information to the attention of residents. The work will be taking place this spring/summer 2021. The exact dates are not yet confirmed. When the work commences it should be short in duration (estimated 1 to 5 days) and could occur as a few sessions.

The work involves directional drilling horizontally below the ground surface for hydro, communications and/or natural gas servicing. It will extend within the Town road right-of-way along the north and south sides of Salzburg Place, approximately at the locations shown in the below key plan in blue.

Residential driveways on Salzburg Place abutting the work should not be negatively impacted, as the majority of the work is beneath the surface. You may see some temporary holes be created as part of the drilling. Disturbed areas will be restored.

Should there be service interruptions to your home, you will receive an additional details directly from the applicable Utility Company, per their protocols.

During the work, you may see construction equipment and site crews on Salzburg Place. You may hear noise from the construction activities, in accordance with the Town Noise Control Bylaw 2002-9.

We apologize for any inconvenience the temporary construction activity or service interruptions may cause you.

For more information, visit the Town's Development Project page and interactive mapping at our website <https://www.thebluemountains.ca/development-projects.cfm>, or contact:
