**RE: Sanitary Service Location Confirmation**

Dear resident,

The Drake's Path Sanitary Service Extension is proceeding to construction in the upcoming weeks. At that time, the contractor will be installing a service connection to the property line of your lot for your future connection to the system. The location of that service connection may be important to you in terms of tree protection or cost savings for minimizing the work required on your property to connect.

If you **have** been in touch with us about the location of your service, it has been included in the tender documents and we will be confirming with you in the field during construction to ensure that it is in the right location when it is installed. Our inspector will leave his card and we will stake out the location of the service again prior to construction.

If you **have not** been in touch with us about the location of your service, and are not usually available at the property from Monday to Friday, and you have a specific location where you want your service, it is important that you contact Jon Auckland via email at [jon.auckland@wtinfrastructure.ca](mailto:jon.auckland@wtinfrastructure.ca) or by phone at (226) 332-0789 before May 15th to arrange for our inspector to meet with you to confirm your service location during construction.

**If we do not hear from you and you have not provided any preference for service location**, then the service will be located in the middle of your property frontage. We will make adjustments due to trees or residence location in order to make the future connection as efficient as possible.

If you have any questions please don't hesitate to contact Mike Humphries at the Town or Jamie Witherspoon and Jon Auckland with WT Infrastructure at the coordinates below.
