RE: Substandard Watermain Replacement Program – Phase 2

Dear Resident,

The Town would like to advise you of upcoming construction planned in your area. A number of watermain sections within the municipality have been classified as substandard and require upgrade. Replacement of these watermains will improve water movement, firewater flow, reduce opportunities of stagnant water, increase water quality, and provide operational savings.

Two areas have been identified by Town staff as part of Phase 2 for construction in 2023. These areas are:

- Napier Street West in Thornbury from Victoria Street South to 96 Napier Street West
- Woodland Park Road in Camperdown

The construction tender for Phase 2 work will be released in late May and is expected to be awarded by mid-July. Construction will be completed in 2023 based on the contractor's schedule. A supplementary notice with schedule details and more information about construction impacts will be sent to you following the award of the tender, prior to the start of construction.

The Town has also created a dedicated project page which will be updated with more details about the project as it progresses. Here you will also be able to subscribe to our dedicated project email list to get updates sent directly to your inbox throughout the project.
